Introduction

Foseco offers the foundryman a complete range of silicon carbide and clay graphite crucibles, retorts and other specialised shapes for use in fuel fired, induction and electric resistance furnaces.

Advantages:

- + Long Life
With careful handling and maintenance, excellent crucible life can be achieved.
- + Fast Melting
High thermal conductivity ensures that charge materials are melted quickly and effectively saving time and money.
- + Energy Efficient
Foseco crucibles require less energy to melt and hold the liquid metal.
- + Tailor Made
A wide range of basic shapes and sizes are produced. Customised shapes and sizes are available on request.
- + High Volume
Foseco offers the largest crucible sizes in the market. Aluminium crucibles of more than 3 tonnes are available.

ENERTEK / DURATEK / Diamant Special / Universal / Top

ENERTEK

A new family of energy efficient crucibles that have been formulated and manufactured to offer the most thermally efficient crucible for melting and holding.

DURATEK

A new family of crucibles with improved properties designed for specific applications to achieve an extended service life.

DIAMANT SPECIAL

Premium quality, isostatically pressed crucibles for low temperature applications with good thermal conductivity and chemical attack resistance.

DIAMANT UNIVERSAL

Premium quality, isostatically pressed crucibles with good thermal conductivity. Suitable for a wide range of high temperature applications including copper alloys and zinc distillation.

DIAMANT TOP

Isostatically pressed crucibles with very high electric resistivity. Specially designed for use in high frequency and/or high power induction furnaces.

Crucible Care - The Foseco guide to safety and long service

1 INSPECT CRUCIBLES WHEN RECEIVED. 	7 KEEP FURNACE LINING IN GOOD REPAIR. The furnace lining must be in good repair, and as concentric as possible. This will stop flame deflection/impingement in flame-fired furnaces, and will assure proper melting in induction furnaces. 
2 STORE IN A DRY PLACE. 	8 CHARGE CRUCIBLES CAREFULLY. Don't wedge. 
3 MOVE CRUCIBLES PROPERLY. Do not roll or shimmy. Use a hand cart. 	9 USE SLIGHTLY OXIDIZING FLAME. Don't let flame impinge directly on crucible. Centre line of burner should be at juncture of crucible and base block. 
4 USE THE PROPER PEDESTAL. Same material - right size. 	10 CRUCIBLE SHANKS MUST FIT PROPERLY. They must support the crucible bottom at all times. 
5 NEVER WEDGE THE CRUCIBLE. Let crucible expand and contract. 	11 USE THE RECOMMENDED FOSECO FLUX. Follow application instructions set in the Technical Data Sheet. 
6 AVOID TOP SMOTHERING. The furnace cover or lid should not rest on the top crucible wall. In electric resistance furnaces, the fibre blanket should not be fully compressed on the top of the crucible. 	12 KEEP YOU CRUCIBLE CLEAN. Remove dross build-up carefully while the crucible is hot.
