VESUVIUS Health and Safety Responsibility

We Care for You and the Environment
We Care for you and the Environment

Ensuring your safety is our first responsibility
VESUVIUS has a long-standing commitment to the highest standards for the health and safety of our employees, customers, and contractors as well as to the protection of the environment in the communities in which we live and work. Committed to these standards, VESUVIUS is providing services and products that enhance and optimize our customers' performance, product quality and operational safety.

- Real and conscious involvement of VESUVIUS employees
  Our people thrive on the challenge to excel in any environment. Their dedication to safety and customer service worldwide is our greatest strength.

- Our commitment to technology and quality is the basis for our competitive advantage.

What you should know about Hexavalent Chromium 6
The implementation of the REACH Legislation in 2016 in Europe and demands expressed in various regions of the world require banning prospectively compounds containing Hexavalent Chromium (Cr6+). Hexavalent Chromium is genotoxic and can at chronic inhalation increase the risk of lung disease.

Hexavalent chromium (Cr6+) material is used as anticorrosive agents in paints, primers, and surface coatings. In the metal industry the material is added as chromic acid and electroplated onto metal parts to provide a decorative or protective coating.

First fused silica company offering green solutions
VESUVIUS is first to the market with its new innovative and qualified corrosion resistant end caps that do not contain Hexavalent Chromium Cr6+ on its well-recognized ZYAROCK® Glass tempering rolls and ZYAROCK® lehr/lift-out rollers.

ZYAROCK® Glass tempering rolls assembled with the SMARTLY DRIVEN™ end caps provide in addition a product completely free of Formaldehyde.

Combining these two innovative aspects makes VESUVIUS the only glass tempering roll supplier worldwide offering an environmental friendly and safe solution.
