

VESUVIUS PLC

# Company overview

March 2021

LEADING THE WORLD OF MOLTEN METAL FLOW ENGINEERING

# Disclaimer

This presentation (which includes this document, the oral presentation of this document, any question-and-answer session that follows that oral presentation and any other materials distributed at, or in connection with, such presentation), which has been prepared by Vesuvius plc (the “Company”), includes statements that are, or may be deemed to be, “forward looking statements”, which can be identified by the use of forward looking terminology, including (but not limited to) the terms “believes”, “estimates”, “plans”, “projects”, “anticipates”, “expects”, “intends”, “may”, “will”, or “should” or, in each case, their negative or other variations or comparable terminology. These forward looking statements include matters that are not historical facts and include statements regarding the Company’s intentions, beliefs or current expectations. By their nature, forward looking statements involve risk and uncertainty because they relate to future events and circumstances. A number of factors could cause actual results and developments to differ materially from those expressed or implied by any forward looking statements. Any forward looking statement in this presentation reflects the Company’s view with respect to future events as at the date of this presentation and is subject to risks relating to future events and other risks, uncertainties and assumptions relating to the Company and its subsidiaries’ operations, results of operations, growth strategy and liquidity. The Company undertakes no obligation publicly to release the results of any revisions or updates to any forward looking statement in this presentation that may occur due to any change in its expectations or to reflect events or circumstances after the date of this presentation. In addition, forward looking statements contained in this presentation regarding past trends or activities should not be taken as a representation that such trends or activities will continue in the future.

Certain industry and market data contained in this presentation has been derived from third-party sources. While the Company believes each of these sources to be accurate, there is no guarantee as to the accuracy or completeness of such data, and the Company has not independently verified such data. In addition, certain of the industry and market data contained in this presentation has been derived from the Company’s own internal research, knowledge and experience of the market. While the Company believes that such data is reasonable and reliable, both it and the underlying methodology and assumptions have not been verified by any independent source for accuracy or completeness and are subject to change without notice. Accordingly, the Company makes no representation as to the accuracy or completeness of the industry or market data contained in this presentation and no reliance should be placed on any of the industry or market data contained in this presentation.

This presentation includes extracts from the Announcement of Full Year results for the twelve months ended 31 December 2020. You should read the whole of that announcement. No reliance should be placed for any purposes whatsoever on the information contained in this presentation or on its completeness. Except as required by applicable law, the Company (nor any of its affiliates, associates, directors, officers, employees, advisers) or any other person is under any duty to update or inform a recipient of this presentation of any change to the information contained in this presentation.

The presentation is being provided for information purposes only. The information contained in the presentation does not constitute or form part of, and should not be construed as, an offer to sell or issue, or the solicitation of an offer to buy or subscribe for, securities or other financial instruments of the Company or any of its subsidiaries in any jurisdiction, or an inducement to enter into investment activity. No part of the presentation, nor the fact of its distribution, should form the basis of, or be relied on in connection with, any contract or commitment or investment decision whatsoever.

The presentation is being made only to, and is only directed at, persons to whom such presentation may lawfully be communicated. This presentation is being made only to and directed only at persons in member states of the European Economic Area (“EEA”) who are qualified investors within the meaning of Article 2(1)(e) of the Prospectus Directive (Directive 2003/71/EC), as amended (“Qualified Investors”). In the UK, this presentation is being made and directed only at Qualified Investors who are persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the “Order”), and persons who are high net worth entities falling within Article 49(2)(a) to (d) of the Order, or are persons to whom it may otherwise be lawful to communicate it to (all such persons being referred to as “Relevant Persons”). This presentation must not be acted on (i) in the UK by persons who are not Relevant Persons and (ii) in any member state of the EEA other than the UK, by persons who are not Qualified Investors. Any investment or investment activity to which this presentation relates is available only to Relevant Persons in the UK and Qualified Investors in any member state of the EEA other than the UK and will be engaged in only with such persons.

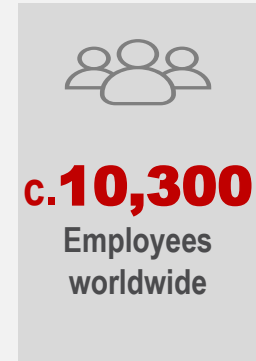

This presentation is not an offer of securities and is not for publication or distribution in the United States or to persons in the US (within the meaning of Regulation S under the US Securities Act of 1933, as amended), or in any other jurisdiction where such distribution is unlawful.

# Who we are

We are a **global leader in molten metal flow engineering** and technology, primarily serving the global steel and foundry industries.

We offer **customised products, solutions and services** to help our customers increase their efficiency and productivity, enhance quality, improve safety and reduce their costs and their environmental impact.

>95% of our **products are consumable in nature** and therefore linked to the volume of steel or metal castings which our customers produce.

A worldwide presence  
(Turnover 2020)

# Steel division overview – Flow Control

Revenues<sup>(1)</sup>

## Offering:

- **Flow Control:** Products, systems and services to regulate and protect the flow of steel in the continuous casting process

## Market Position:

- Global market leader in Steel Flow Control, significantly larger than next closest competitor

- Our customers are steel producers
- Structurally growing crude steel production and the above average market growth of 'high-technology steel' are key drivers of demand for our Flow Control products
- Our products help our customers increase their efficiency and productivity, enhance quality, improve safety and reduce their costs and their environmental impact

# Steel division overview – Flow Control

Revenues<sup>(1)</sup>

■ Vesuvius Steel Flow Control products are highly specialised products used in the continuous casting part of the steel process

**Mechatronics:** Vesuvius has a unique value proposition that is based on perfect collaboration between **Robotics, Flow Control Systems** and associated **Refractory Consumables**

VESUVIUS

# Steel division overview – Advanced Refractories

Revenues<sup>(1)</sup>

## Offering:

- **Advanced Refractories:** Installation expertise and materials that withstand extreme temperatures and offer corrosion resistance at customers' facilities

## Market Position:

- One of the Top-5 players in Advanced Refractories

- We supply specialist refractory materials for lining steel-making vessels which are subject to extreme temperatures, corrosion and abrasion
- We provide advanced installation technologies including robots, computational fluid dynamics capabilities and laser systems for measuring refractory wear
- Our main customers are steel producers, representing c. 80% of the revenue of the business unit, and other industries operating at high temperatures such as aluminium, cement, etc., representing c. 20% of the revenue of the business unit

# Foundry division overview

Revenues<sup>(1)</sup>

## Offering:

We are a solutions provider for our customers, supplying a combination of products, technical advice and application support to improve performance and quality of ferrous and non-ferrous castings

*Vesuvius uses the Foseco brand in the Foundry markets*

- We provide a comprehensive range of ceramic and other consumables used in foundry processes
- Our products make up less than 5% of the total cost of manufacturing, yet are critical to the overall quality and yield of the final casting
- Worldwide presence and excellence in product innovation from network of technology centres
- Some examples of our solutions delivering clear performance improvements
  - **Truck OEM customer.** Our filters reduced scrap by 75%
  - **Iron elevator housing customer.** Our feeding systems increased yield from 55% to 74%
  - **Aluminium customer.** Energy saving of 13% by adopting our energy saving crucibles
  - **Automotive OEM customer.** Introduction of our automated metal treatment for casting of pistons, minimized defects and improved mechanical properties

## Market Position:

- Market leader in the key core product lines of filters; feeding systems; and coatings

VESUVIUS

# Foundry overview – key products

## FEEDING SYSTEMS

*Help avoid shrinkage defects and improve casting yields, reducing the amount of non-productive metal*

## FILTERS

*Remove impurities from molten metal in the casting process*

## COATINGS

*Act as a barrier between molten metal and a core or mould surface*

## CRUCIBLES

*Containers that can withstand very high temperatures, used to melt/store metals*

## METAL TREATMENT

*Equipment and materials for cleaning and treating aluminium*

## REFRACTORIES

*High temperature resistant materials*

# Strategy to deliver long-term sustainable and profitable growth

## Four execution priorities drive our profitable growth strategy

1. Reinforce our technology leadership
2. Develop our technical service offering and increase the penetration of our value-creating solutions
3. Capture growth in developing markets
4. Improve our cost leadership and margins

## In 2020, despite the challenges brought on by the Covid-19 crisis, we made meaningful progress on our strategy:

- We maintained our industry-leading level of R&D investment through the market downturn
- Reinforced technology leadership with the expansion of our Mechatronics Centre of Excellence and our VISO Research Centre in Belgium. We launched 10 new products and installed 3 mechatronics systems during the year
- Delivered strong performance in the growing markets of India, Vietnam, Turkey, Russia, Ukraine and South America
- Successfully completed our restructuring programme to optimise our production network and delivered higher than expected recurring cost savings from the programme

# Focus on value-creating solutions: A few examples

Business unit	The product	Key product feature		Value creation for customer
Flow Control		Duraflex ladle shrouds	Multiple reuse and long-lasting refractory material	<ul style="list-style-type: none"> <li>▪ Improve safety</li> <li>▪ Reduce raw materials consumption</li> <li>▪ Reduce CO<sub>2</sub> emissions</li> </ul>
Advanced Refractories		NextGen Tundish Smart Robot	Fully-integrated spray application system solution enabling digital data recording, tracking and remote diagnostic features	<ul style="list-style-type: none"> <li>▪ Improves quality</li> <li>▪ Increases operator safety</li> <li>▪ Reduces waste</li> </ul>
Foundry		Diamant degassing rotors	Patented rotor design for optimised hydrogen removal from aluminium melts	<ul style="list-style-type: none"> <li>▪ up to 200% longer service life</li> <li>▪ Reduces gas consumption</li> <li>▪ Reduces waste</li> <li>▪ Lower cost per treatment</li> </ul>

# Experienced senior management team

**John McDonough CBE**

**Chairman**

- Appointed Director and Chairman of Vesuvius on 31 October 2012
- John was group Chief Executive Officer of Carillion, the support services and construction firm for 11 years until he retired in 2011
- Prior to joining Carillion, John spent nine years at Johnson Controls working for the automotive systems division
- John served as Chairman of the Remuneration Committee of Tomkins from 2007 to 2010 and as a Non-executive Director of Exel from 2004-2005

**Patrick André**

**Chief Executive**

- Appointed Chief Executive in September 2017
- Joined Vesuvius in February 2016 as President of the Flow Control Business Unit
- Prior to joining Vesuvius, Patrick worked at Lhoist, world leader in lime production, where he was the Executive Vice President Strategic Growth, CEO for Europe and CEO for Asia, CIS and Africa
- Previously, Patrick was CEO of both the Nickel and the Manganese divisions of Eramet Group

**Guy Young**

**Chief Financial Officer**

- Joined Vesuvius as CFO in November 2015
- Prior to joining Vesuvius, Guy served as CFO of the British building materials company Lafarge Tarmac
- Previously, Guy held a number of senior financial and business development positions within Anglo American and Scaw Metals Group, where he held the position of CFO from 2004-2007

# Corporate values to deliver our strategy

## Courage

I have the courage to decide and do what is right, including when it is difficult, unpopular or not consensual.

## Ownership

I am personally accountable for the consequences of my actions.  
I demonstrate an entrepreneurial spirit and manage the Group's money as if it were my own.

## Respect

I listen and demonstrate respect for other peoples' ideas and opinions.  
I never underestimate competition.

## Energy

I work hard and professionally in pursuit of excellence.

**Structurally  
growing end  
markets**

VESUVIUS PLC

# Structural growth opportunity in steel

Sources: Historical data and 2021 forecast from World Steel Association. Forecasts from 2022 are management estimates

Notes:

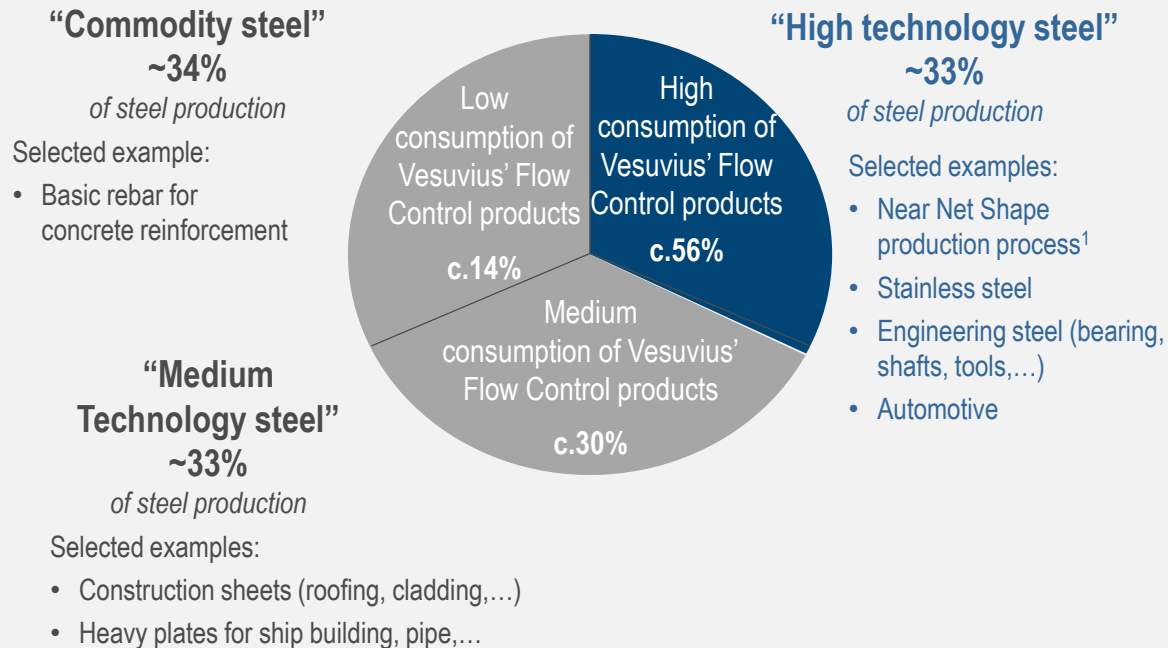

- 1. CIS, Middle East (incl. Turkey), Africa, Latin America and SE Asia
- 2. EU 27 + UK, USA, Canada and North Asia

# “High technology steel” is growing faster than crude steel

**POSITIVE MIX EFFECT SUPPORTS OUTPERFORMANCE OF FLOW CONTROL GROWTH RELATIVE TO CRUDE STEEL PRODUCTION**

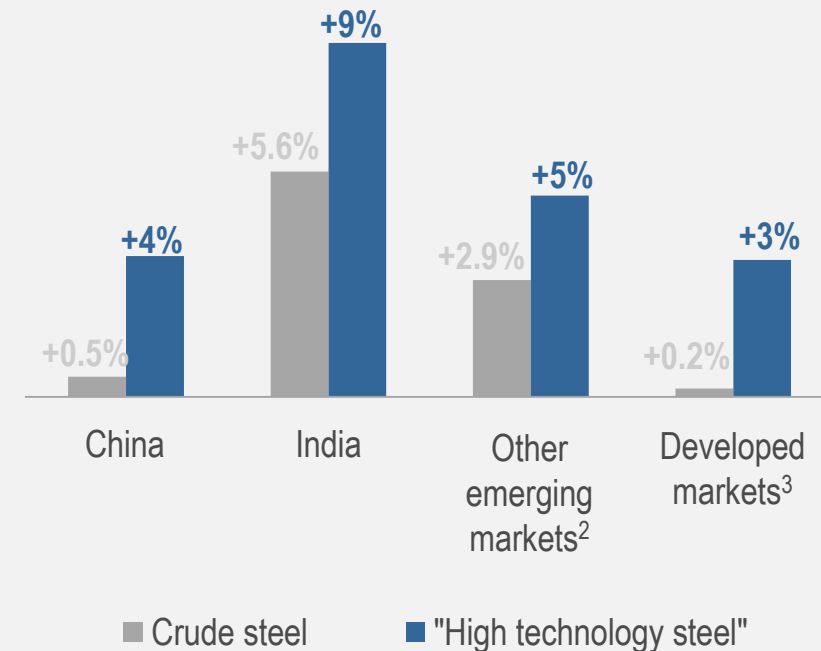

## VESUVIUS' CRUDE STEEL PRODUCTION SEGMENTATION

(World crude steel production 2020: 1,829 mt)

## “HIGH TECHNOLOGY STEEL” GROWTH VS. STEEL PRODUCTION GROWTH

CAGR (2021 – 2030)

Notes: 1. Continuous manufacturing process of very close to final (net) shapes

2. CIS, Middle East (incl. Turkey), Africa, Latin America and South East Asia

3. EU 28, USA, Canada and North Asia

Source: Management estimates

# “High technology steel” is growing faster than crude steel

POSITIVE MIX EFFECT SUPPORTS OUTPERFORMANCE OF FLOW CONTROL GROWTH RELATIVE TO CRUDE STEEL PRODUCTION

Examples of applications of HIGH TECHNOLOGY STEEL driving growth

Wind turbines require high strength steels

Wind energy requires 8 – 10 times more steel per MWh of energy than fossil fuel derived energy

Advanced steel cans are produced from “high technology steel” because of the need to achieve a challenging combination of thin gauge and high rigidity / strength

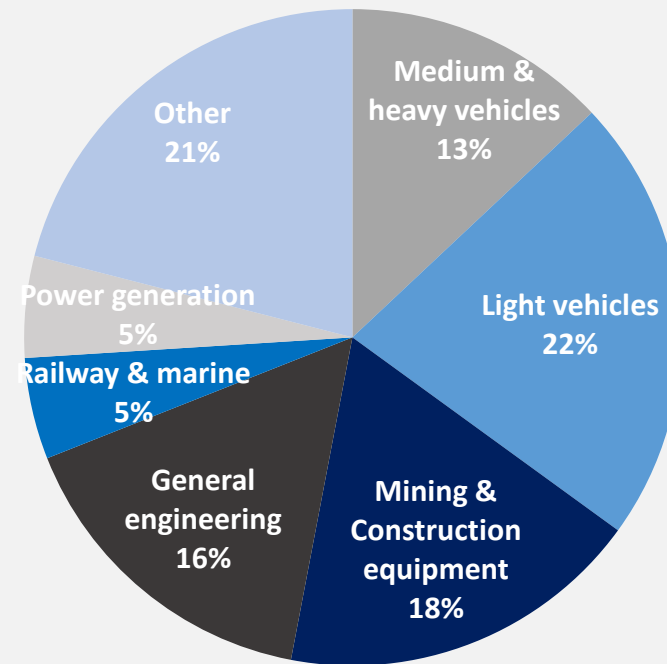

Increasing use of “near net shape”<sup>1</sup> (thin strip casting, etc...) production process because of its cost effective characteristics (i.e. reduced plant space and CO<sub>2</sub> emissions)

Note: 1. Continuous manufacturing process of very close to final (net) shapes

# Foundry Casting production is structurally growing

VESUVIUS FOUNDRY END MARKETS

Source: Global casting market data (historical and forecasts) from Oxford Economics

Notes: 1. CIS, Middle East (incl. Turkey), Africa, Latin America and South East Asia

2. EU 28, USA, Canada and North Asia

# Foundry Casting production is structurally growing

VESUVIUS OPERATES IN FOUNDRY SEGMENTS  
GROWING FASTER THAN THE UNDERLYING MARKET

## STRUCTURAL SHIFT IN THE FOUNDRY INDUSTRY

towards higher sophistication  
and increasingly complex castings

## COMPLEX CASTINGS

- ✓ Cleaner metal
- ✓ Lighter weight
- ✓ Complex shapes with thinner sections

- CUSTOMERS REQUIRE MORE VALUE ADDED PRODUCTS AND SERVICES TO MINIMISE METAL LOSS AND DEFECTS
- VESUVIUS' FOUNDRY DIVISION PROVIDES COMPUTATIONAL FLUID DYNAMICS ("CFD") SIMULATION AND CASTING DESIGN ADVICE TO ACHIEVE THE DESIRED QUALITY

# Vesuvius operates in Foundry segments growing faster than the underlying market

## COMPLEX CASTINGS REQUIRE INNOVATIVE PRODUCTS FROM VESUVIUS' FOUNDRY DIVISION

Examples of applications in the foundry industry driving growth

Development of more sophisticated iron alloys with better mechanical properties for heavy commercial vehicles

Increased use of wind power generation drives growth in high-value super-sized castings

Increasing demand for complex light weight castings to compensate for heavy batteries in hybrid and electric vehicles

Increasing use of turbochargers in internal combustion and hybrid vehicles

# Vesuvius' technological leadership enables outperformance of underlying markets

- R&D reinforces our product pipeline with new innovative products and solutions which will support our future organic growth
- We are focused on combining developments in robotics, automation and data analytics capabilities with our well-established material science research
- In 2020, we maintained our industry-leading level of R&D spend as a percentage of revenue at 1.9%
  - Going forward we remain committed to spending c.2% of sales on R&D

Main R&D Centres of Excellence

R&D Spend as % of Sales

# Vesuvius' technological leadership enables outperformance of underlying markets

Selected examples of Vesuvius' advanced products and solutions

## LASERS

Scanned image of a basic oxygen furnace created by one of Vesuvius' lasers showing the refractory wear spots in the lining

Enables targeted repair, delaying need for costly full replacement

## MATERIAL SCIENCE

New generation of Vesuvius Flow Control refractories

The new design and material recipe offer enhanced performance in a large range of applications

## ROBOTICS

Combined (robotics and consumables) patented solutions offered to our customers worldwide to install and replace Vesuvius' consumables

## COMPUTATIONAL FLUID DYNAMICS ("CFD") CAPABILITIES

Optimises casting or refractory design and helps deliver the highest possible quality casting or steel

# Group Sustainability Initiative

VESUVIUS PLC

# Sustainability at Vesuvius

Objective to reach NET ZERO carbon footprint by 2050 at the latest

## Progress follow-up:

- 9 intermediate targets
- 56 KPIs monitored
- Establishment of the **Vesuvius Sustainability Council**

Intermediate Targets					
<b>1</b>	Energy consumption	<b>2</b>	Energy CO <sub>2</sub> e emissions	<b>3</b>	Wastewater
<b>4</b>	Solid waste	<b>5</b>	Recovered & recycled materials	<b>6</b>	Safety
<b>7</b>	Gender diversity	<b>8</b>	Supplier sustainability assessments	<b>9</b>	Compliance training

## WE SUPPORT UN Global Compact

Reflects our commitment to the UN principles in the areas of human rights, labour, the environment and anti-corruption

## Our targets directly support 6 of the UN SDGs

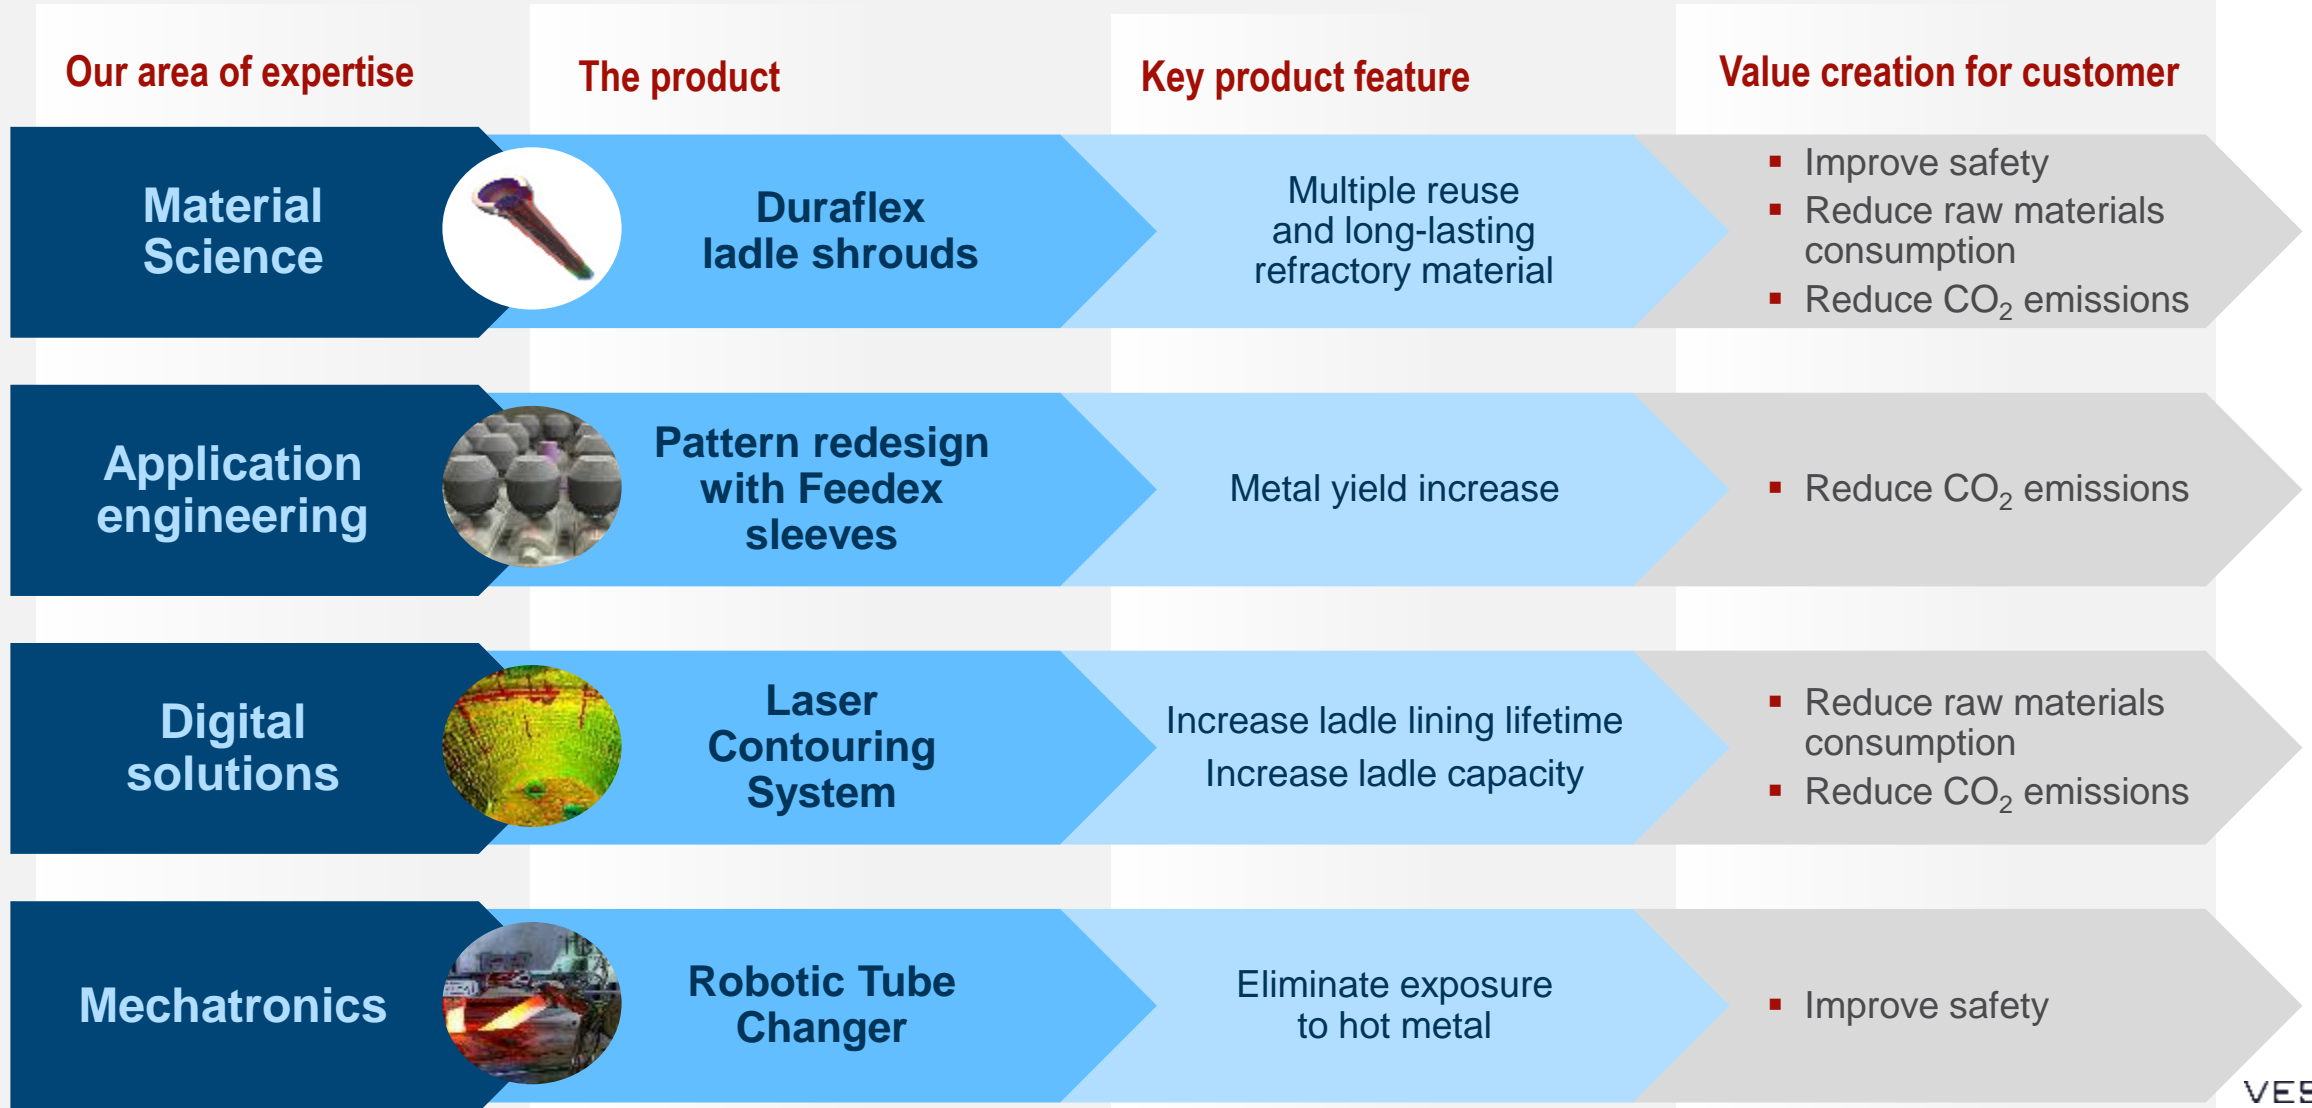

Sustainable Development Goals

# Positive momentum on our intermediate ESG targets

KPI	Target	Progress in 2020	SDG Supported
<b>Energy Consumption</b> Energy consumption per metric tonne of product packed for shipment	10% reduction by 2025 (vs 2019)	-3.4%	 
<b>CO<sub>2</sub> Emission</b> Energy CO2e emissions per metric tonne of product packed for shipment	10% reduction by 2025 (vs 2019)	-3.9%	 
<b>Waste Water</b> Waste water per metric tonne of product packed for shipment	25% reduction by 2025 (vs 2019)	-7.5%	  
<b>Solid Waste</b> Solid waste (hazardous and sent to landfill) per metric tonne of product packed for shipment	25% reduction 2025 (vs 2019)	-16.1%	 
<b>Recovered and Recycled Material</b> Recovered or recycled materials from external sources	7% to be used by 2025	5.8% (2019: 6.2%)	 
<b>Safety</b> Lost Time Injury Frequency Rate (per million hours worked)	Zero accident	1.12 (2019: 1.54)	 
<b>Gender Diversity</b> Female representation in Top Management (GEC plus key direct reports)	30% by 2025	20% (2019: 12.5%)	
<b>Supply Chain</b> Sustainability assessments of raw material suppliers	50% of Group spend by the end of 2023	Programme launched	  
<b>Compliance Training</b> Percentage of targeted staff completing Anti-Bribery and Corruption training	At least 90% annually	100%	

# We help our customers improve their sustainability performance

# 2020 Performance update

VESUVIUS PLC

# 2020 operational highlights: ready for growth

## Safety: our top priority

- Our best year ever with an LTIFR of 1.12
- Goal remains to become a zero injury company

## Optimised plant network geared for growth after successful restructuring

- £20.6m of recurring savings in 2020 with a further £4.3m to be realised in 2021
- Global production capacity preserved, ready to follow market demand ramp-up

## Leaner and more efficient, with new ways of working

- £39.0m of temporary cost savings in 2020 – more than £8m are expected to become permanent

## Future top-line growth drivers protected during the crisis

- Maintained industry-leading level of R&D investment, supporting top-line growth
- 10 new products launched in 2020 with 22 new product launches planned in 2021

## Strong cash management supported by entrepreneurial, decentralised business model

- Working capital / sales (12m average) improved to 23.2% versus 24.0% at the end of 2019

*"We are emerging from this difficult period stronger than before and are ideally positioned to seize the opportunities offered by positive market trends."*

**Patrick Andre**  
**Chief Executive**

# Group Financial Performance FY 2020

## Revenue

**£1,458.3m**

2019: £1,710.4m

## Trading profit

**£101.4m**

2019: £181.4m

## Return on Sales

**7.0%**

2019: 10.6%

## Profit before tax

**£64.5m**

2019L £118.6m

## Headline earnings per share

**23.2p**

2019: 45.1p

## Group full-year dividend

**17.4p**

2019: 6.2p

## Adjusted Operating Cash Flow

**£175.2m**

2019: £217.7m

## Cash conversion ratio

**173%**

2019: 120%

## Divisional Performance

Flow Control	Advanced Refractories	Foundry
£561.3M	£458.6M	£412.9M
2019: £626.3M	2019: 539.8M	2019: £515.1M
